

SAFE CITIES' FIND CPS : Custody Photography System

'The first custody photography system in the country to fully comply with the National Standards set out by PITO [NPIA]' - Jane's Police Product Review, April/May 2006.

An accurate, easy to use digital photography system that enables the consistent capture of high resolution FIND-compliant custody images.

FIND CPS is available with the following user interface variants:

- Keyboard/mouse,
- Touch-screen,
- Lectern-Style Kiosk,
- Photo Booth.

The Safe Cities' system utilises fast accurate artificial intelligence (AI) algorithms to control a digital SLR, enhance focus and framing, and provide automatic formatting to the FIND standard. The advanced software allows operators to consistently capture FIND standard images with a few minutes training.

Key Benefits:

Chief Constable Mike
Culverhouse with FIND CPS

- The system enables Police/Security personnel to take quality-assured photographs after only a few minutes of training.
- The Face Detector automatically locates, rotates and crops the image to the FIND standard.
- The user interface is simple and robust. Hardened Kevlar versions are available if required.
- Instant digital control and quality auditing of the image in real-time, means any adjustments in the positioning of the suspect or the status of the environment (lighting, shadows etc.) can be made on the spot.
- The system is simple and quick to install, and runs on standard, off-the-shelf hardware.
- Supported by our Blue-Chip partners.
- Any distinctive scars, marks or tattoos (SMT's) are easily photographed using our patent-pending capture system.

"Safe Cities' photo system delivers good quality images and requires a minimum of operator input. The images are now totally consistent, in terms of size, quality, composition and background colour." - Chief Constable Mike Culverhouse, Criminal Justice Management magazine, July 2006

SAFE CITIES' FIND CPS : Custody Photography System

Lectern-Style Kiosk Variant:

Complete System: PC, Camera, Touch-screen in one kiosk – requires only power and LAN connection (if required).

Simple to Use : The usability-enhanced user interface features large buttons, QWERTY keyboard for data entry, logical button separation, and utilizing a Linear Wizard Metaphor.

Ease of Access and Visibility: The operator can maintain sight of the photographic subject and the space allows easy wheelchair access.

Ruggedised Design: The kiosk bolts to the floor and toughened glass options are available.

Embedded Camera

Easy to Use Touch-Screen

Artificial Intelligence Ensures
FIND Compliance

Photo-Booth Variant:

Complete System: PC, camera, lighting and operator's touch-screen in one booth, requiring only power and LAN connection (if required).

Self-Contained Lighting: Easy to maintain consistent lighting conditions across custody photography locations. The closed curtain ensures no extraneous light pollution.

Simple to Use: Usability-enhanced user interface features large buttons, QWERTY keyboard for data entry, logical button separation, and utilizing a Linear Wizard Metaphor.

Re-Usable: Can be moved, stored and re-installed with station refits or between sites.
